Leapfrog 3D Printers Joins Ingram Micro's European Portfolio

MUNICH, GERMANY – January 07, 2015 – Leapfrog 3D Printers is the latest 3D printing vendor to be signed up by Ingram Micro Technology Solutions Europe, part of Ingram Micro Inc. (NYSE: IM). With Leapfrog Solutions, Ingram Micro offers the channel a complete package of tools and solutions designed to appeal to specialized user groups including engineers, architects and schools.

"We are extremely pleased to be adding the products of Leapfrog 3D Printers to our European portfolio. Their range of printers, printing materials, software, hardware add-ons and services complement our current offering and allow us to present our channel partners with a complete range of solutions and a great sales and service opportunity." commented Rudolf Ehrmantraut, head of peripherals and supplies for Ingram Micro Technology Solutions Europe. "Over the last few months we have seen rapid expansion of our portfolio as we have seen this market move very quickly."

The new additions to the Ingram portfolio are the Creatr HS which offers a completely stand-alone 3D printing experience ideal for schools and companies starting out with 3D printing and the Xeed 3D printer, a professional 3D printer which has features such as a heated environment; allowing printing using a range of materials as well as automatic bed calibration and automatic filament loading. Two printers which will allow our resellers to meet a range of end-user needs.

Mathijs Kossen, CEO of Leapfrog 3D Printers, stresses the importance of working with a partner like Ingram Micro: "Getting on board with Ingram Micro as a distribution and supply chain partner allows us to efficiently meet the enormous market demand for our products in all of Europe. We view Ingram Micro as an excellent partner considering our joint focus on vertical markets. We are confident that our 3D printing solutions will help Ingram Micro's resellers add major value for their professional and educational clients."

###

About Leapfrog 3D printers

Leapfrog 3D printers is a producer of desktop and professional 3D printers based in The Netherlands. Their aim is to help professionals and schools to uncover all the benefits 3D printing can offer for them. In order to do this, they work closely together with their customers, whom they treat as partners. Leapfrog 3D Printers therefore understands that 3D printing is about much more than just the 3D printer itself; It is about the printing materials, about software, about hardware add-ons, about services and about educating the market. This is called Leapfrog Solutions: which includes all the tools user groups need to add real value for their purpose. Their current solutions focus on schools, mechanical engineers and on 3D printer novices and more are on the way. Keep an eye on Leapfrog 3D Printers, because, together with their clients, they Create the Future. Find out more through www.lpfrg.com.
